

## **Raleigh Park signage proposal**

### **1. 3x A1 map signs with illustrated map**

To be located at key points where paths converge on main routes, short distances inside the reserve.

Recycled plastic wood effect upright frame OR Oak 'cow proof' frame

To include brief information about the habitats, history and management

Map to include pathways and key features of the site.

### **2. 1 or 2 x A2 habitat signs**

Located at key habitat features of the site e.g. pond

Will include large full colour illustration of the habitat and wildlife

### **3. Custom size toposcope panel (1500mm x 500mm) mounted on oak stand**

An etched stainless steel panel mounted on a custom lectern made from an oak tree which has fallen on the site.

The etching will show a panoramic view of the dreaming spires and surrounding landscape as seen from Raleigh Park. Labels will mark key features in the city and surrounding area.

### **4. View finder sign/monolith**

An upright piece of oak from a tree which has fallen on the site, possibly making the most of the natural shape of the tree.

The sign will contain a slot where people can rest their

camera/smartphone to capture the best view of the dreaming spires.

An information panel will invite them to share their image on social media.
